BRICS STI partnership a recognised force in global science arena

BRICS summit, to be hosted in South Africa, will mark the 10th anniversary of the group, which includes Brazil, Russia, India, China and South Africa. The summit will be a platform to discuss the future of global science, technology and innovation (STI) cooperation, with a focus on inclusive and sustainable development.

The BRICS countries have committed to fostering STI cooperation and innovation as a means to achieve sustainable development and to address global challenges such as climate change, poverty and inequality. The summit will feature discussions on how to strengthen STI cooperation in these areas, as well as on how to leverage the potential of the BRICS countries to drive innovation and technological progress.

The summit will also provide a platform for stakeholders from the public and private sectors to exchange views on how to foster STI cooperation, how to improve access to STI resources and how to ensure that the benefits of STI innovation are shared equitably.

The BRICS countries have already made significant progress in fostering STI cooperation, with joint research centers and innovation platforms being established to facilitate knowledge exchange and collaborative projects. The summit will be an opportunity to review these achievements and to set new priorities for the future.

The BRICS countries are committed to working together to ensure that STI initiatives are inclusive and sustainable, and that they contribute to the achievement of the United Nations Sustainable Development Goals. The summit will be a platform to discuss how to ensure that the benefits of STI innovation are shared equitably, and how to address any challenges that may arise in the process.

In conclusion, the 10th BRICS summit will be a platform to discuss how to strengthen STI cooperation and innovation as a means to achieve sustainable development and to address global challenges. The summit will provide an opportunity to review the achievements of the previous nine summits and to set new priorities for the future.
